DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13, 16-21 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Ashmead et al. (US 5,534,328). Regarding claims 1, 4, 6 and 7, Ashmead discloses a device having a mixing chamber (64) wherein a wall of the mixing chamber has a temperature control channel (for example 74) which is separate and discrete from the at least one mixing chamber (see col. 11, line 65 to col. 12 line 15, where it is explained that heat exchange fluid enters inlet port 75 and exits outlet port 76. The mixing chamber is separate and distinct with fluids entering and exiting via ports 20, 24, 30 and 34). Regarding claim 2, energy can be feed or removed electrically (see col. 10, lines 26-38). Regarding claim 3, 8-10 and 21, energy can be fed or removed from the at least one mixing chamber by a medium through the channel (see col. 9, lines 15-16). Regarding claim 5, the chamber may be provided with a catalyst (see col. 13, lines 11-21). Regarding claim 11, an inlet (20 or 24) is disclosed. Regarding claims 12-15, the wall comprises a plurality of plates or sheets bearing against one another (200,300,400, etc.). Regarding claim 16, see col. 3, lines 4-23 for material of which the device is made, which include metal and plastic. Regarding claims 17, 18 and 24, "The patentability of a product does not depend on its method of

production" *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985), nonetheless see col. 6, lines 39-54. Regarding claims 19 and 20, the reaction chamber is in channel form (see drawings).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14, 15, 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ashmead et al. (US 5,534,328). The device of Ashmead was discussed above. The particular sizes recited in these claims are not explicitly disclosed. See *In re Rose*, 220 F.2d 459, 105 USPQ 237 (CCPA 1955) regarding the obviousness of selecting a size.

Response to Arguments

5. Contrary to applicant's remarks, the heat exchange channel 74 of Asmead is separate and distinct from the mixing chamber. The heat exchange fluid enters at 75 and exists at 76, which the ports for the mixing channel are 20, 24, 30 and 34.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
